GEM-CAR

GEM-CAR: Automotive Repair Shop Management Software

Efficient auto repair business management with GEM-CAR

Easy to use software!

« Before using GEM-CAR, I used to spend about 4 hours a week on billing. Now it only takes a few minutes...»

Sébastien Laflamme, Owner, Garage Laflamme

A simple philosophy!

When choosing to implement **GEM-CAR** in your business, you actually cross an important threshold in your commitment towards your customer, your staff and your business. The benefits are not solely link to products purchases but, more importantly, linked to the training, ease of implementation and the simplified day to day management included in the overall product offer. Simply put, when the functionalities of **GEM-CAR** are fully applied, the entire business will enjoy the benefits the software was designed to provide.

Putting modern technology to work for you!

When choosing **GEM-CAR**, you've selected a business system based on the most recent technological advancements. You always get the most up to date version and benefit from all on-going advancements and improvements from our research & development team. Putting **GEM-CAR's** modern technology to work for you means;

- Quick up and running and at very little cost,
- Designed to facilitate data transfer from other programs such as VL, etc.
- Easy to use and so intuitive, less training time,
- Remote access,
- Multiple user stations,
- Very user friendly.

Implementing a management system is a sound business strategy and objective!

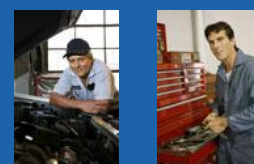

The implementation of **GEM-CAR** as a management tool allows for effective real life performance measurement of overall and per work order time management and profitability, generating a permanent accurate historical database for instant consultation, evaluation and faster corrective response.

Order to improve and maximize efficiency, we train your staff on the proper use of **GEM-CAR**.

GEM-CAR is so user friendly and practical, your staff will truly enjoy using it!

A smart implementation plan is key!

The implementation of **GEM-CAR** in your business requires a commitment from all staff members that will be using the system, including key managers and owners. Like tools in your shop, without proper training, you can not enjoy the benefits and full potential. Proper training and support of all team members is essential and is directly linked to the quality of the work life for your staff and the business results **GEM-CAR** is designed to provide.

Training: a major component for success!

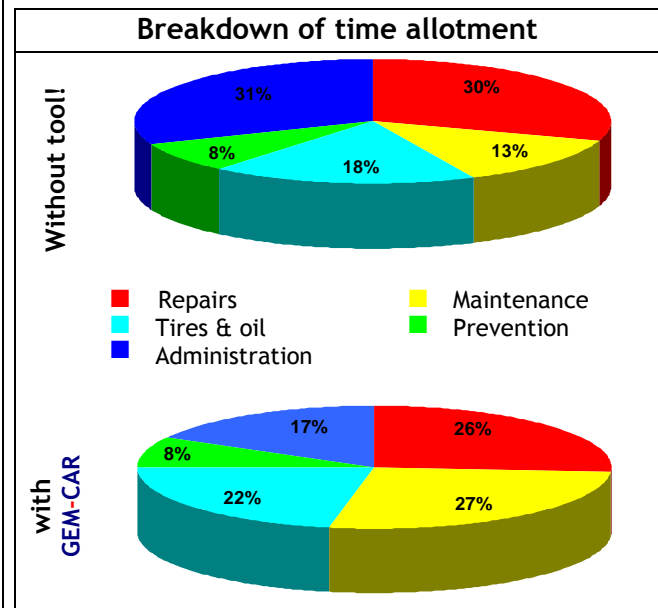

The commitment and understanding from all staff members is the key to any change or improvement. In preparation for training, it is critical that training be adapted to the individual competencies of staff members. **GEM-CAR** was designed specifically by & for the auto repair industry and environment, further making **GEM-CAR** THE software of choice!

GEM-CAR basic includes;

- Software
- Software installation,
- On-Site Training and coaching on:
 - Best practice work procedures,
 - Best practice customer service,
 - Shop and operations management,
